## Professional summary

Results-driven Cloud Operations Engineer with hands-on experience in workload automation, cloud platforms, infrastructure automation. Skilled in managing large-scale batch jobs, troubleshooting cloud and application issues, and ensuring high system availability through proactive monitoring and incident management. Experienced with AWS, Azure, Terraform, Python, JAMS Scheduler, and SolarWinds to deliver reliable and efficient cloud solutions.

## Experience

### Tata Consultancy Services Cloud Operations Engineer

Jan 2024 - Present

- Managed and monitored 500+ enterprise batch jobs using **JAMS Scheduler**, ensuring seamless **cloud workflow execution** and adherence to strict SLAs.
- Supported cloud integration operations across **AWS and Azure environments** by troubleshooting incidents, resolving job failures, and **minimizing production downtime**.
- Automated operational tasks and **infrastructure activities** using **Python and Terraform**, improving efficiency and **reducing manual intervention**.
- Monitored **system health** and **integration performance** using **SolarWinds**, proactively identifying issues and **ensuring high availability of cloud-based services**.

## Skill Set

- **Core Skills:** Cloud operations, Incident Management, Troubleshooting, Automation, Infrastructure Monitoring
- **Cloud Operations:** JAMS Scheduler, SolarWinds, CloudWatch **ITSM tools:** Fresh-Service, Jira
- **Scripting & Automation:** Python, Bash, Linux Administration
- **Cloud Platforms:** AWS, Microsoft Azure
- **Workload Automation:** Git, VS code
- **Infrastructure as Code (Iac):** Terraform, AWS CloudFormation
- **Networking & Security:** VPC Design, Subnets, IAM Roles & Policies, Security Groups, DNS, Load Balancers
- **Containerization & Orchestration Tools:** Docker, Kubernetes, Amazon (EKS)
- **CI/CD & DevOps:** GitHub Actions, CI/CD pipelines, AWS CodePipeLine

## Projects & Activities

- Designed and deployed **AWS VPC architecture** with public and private subnets for scalable web applications.
- Provisioned **EC2 instances with Auto Scaling and Load Balancer** to ensure high availability and fault tolerance.
- Configured **IAM roles, security groups, and CloudWatch** monitoring for secure and reliable infrastructure management.
- Automated infrastructure provisioning using **Terraform modules, reducing manual deployment effort**.
- Built CI/CD pipelines using GitHub Actions for automated **Docker image deployment to AWS environments**.
- **Collaborated with DevOps, QA, and application teams** to support deployments, monitoring, and issue resolution.

## Certifications

- Fundamentals in Python- Udemy
- Terraform Fundamentals- Udemy
- AWS AI Practitioner- Skill Builder
- Docker Fundamentals- Udemy
- Microsoft Azure AI Fundamentals - Udemy

## Education

**B.E Electronics & Instrumentation engineering**  
Sri Sairam Engineering college, Chennai | **CGPA: 8.56 /10**

**2019- 2023**
